

# DRYSPACE™

## A DRY ENJOYABLE OUTDOOR LIVING SPACE

Ideal for second-story decks, TimberTech's DrySpace under deck drainage system collects and channels moisture from the spaces between your planks. Attaching easily to your new or existing deck joists, DrySpace effectively turns lower level patios into extra leisure and storage space – creating a usable and completely dry space under your deck. The off-white color design lightens and brightens the area under a deck, giving that space a crisp, finished look.
